

# ***Cornerstones of The Strategy***

## **◆ Sailors**

- Our most valuable system
- Design ships and systems around them

## **◆ Training**

- Improve efficiency and effectiveness
- Support new and expanded warfare mission areas
- Must define team / watchstation / billet tasks
- Tailor, tailor, tailor

## **◆ Distance Support**

- Top down functional analysis
- Create shore site / anchor desk
- Reserve sufficient bandwidth

# 21st Century Concept -- Training

- ◆ Initial training continues ashore, but improved to produce a full up round
- ◆ Continuing (OJT, Proficiency, and Currency) training expands and improves onboard and at fleet concentration areas
- ◆ New and expanded warfare areas will be supported with mission area training
- ◆ Premium on each individual's training will increase as crew size decreases
- ◆ Can not allow “stove pipe” programs to establish uncoordinated and unaffordable HSI / MP&T requirements

***Training must become better, more tailored  
and more efficient***

# *New and Expanding Warfare Areas Program*

- ◆ Stovepipe programs lead to uncoordinated manpower and training requirements
- ◆ Today's Land Attack decisions may **constrain DD 21 options**
- ◆ Bandwidth required for not only tactical, but “other” distance support
